

XLM H25

Barco's new XLM projector has been specifically designed for the demanding rental & staging and large events markets. The first DLP projector with a native wide-screen aspect ratio, native 2048 x 1080 resolution and light output of 27 000 Center Lumen, the XLM is the most powerful projector available on the market today. Featuring a fully sealed DMD engine and high-power 6kW XENON-lamp, the XLM projector also ensures reliable, high-quality performance in even the most demanding environments.

As the ultimate ultra-high brightness projector, the XLM is purpose built to work around the clock: it's functional design and adjustable convergence system allow it to stay in the field while still maintaining a premium picture over its entire lifetime.

XLM H25 specifications

• Light output	27000 Center lm
• Technology, resolution	sealed 3 chip dark metal DMD engine, 2048x1080 pixel native resolution
• Aspect ratio	1,9:1
• Contrast Ratio	1200:1
• Lamp power	6kW
• Lamp lifetime	500 h, 1000h max.
• Max. ambient temp	35 Celsius
• Modular inputs	Composite video, S-video, YUV, RGBHV analogue, SDI, HD-SDI, DVI up to UXGA
• Mains voltage:	3x400V + N or 3x 220V, field configurable
• Power consumption	8kW
• Weight	180kg
• Network connection	Standard

Special functions

• Image windowing	free positioning of all signal inputs at the same time, layout can be stored and recalled by menu
• Control	via OSD, Ethernet-LAN, RS-232
